

## Outdoor Lanterns

### *How long will it take the lantern to burn?*

The lantern will burn for about 15 hours with a one-pound LP tank.

### *Is the lantern moveable?*

The lantern can be mounted on any deck, patio or rail, or can stand alone. The French Colonial Lantern can be placed on any flat outdoor surface. The lantern is UL-listed and safety tested for any surface.

### *Can the lantern be secured?*

Yes, the lantern can be secured to a deck, patio, cement or other hard surface. The lantern comes with a mounting kit that will secure it to these surfaces.

### *Will the lantern withstand inclement weather?*

The weighted base will withstand strong winds. The aluminum is rust-free and will last outdoors for years.

### *How is the lantern switched on and off?*

The lantern has a patented electronic ignition...just use the on/off switch! No matches or pilot is used.

### *What is the style of the lantern?*

The French Colonial Lantern features an antique bronze finish and beveled, tempered glass with etched logo and painted steel housing with robust UV protective paint.

### *Does the lantern come assembled?*

No, there is some assembly required. The lantern sets up in minutes with no gas lines to install.

### *Is the lantern expensive to run?*

The burner only uses 1,500 BTUs per hour. This amounts to just pennies per hour to operate.
