

Cape Cod Pergola

What is the pergola made out of?

The pergola is made from reinforced steel and fiberglass with a realistic wood and stone finish. The pergola is styled in a classic column-and-beam arbor design.

Will the pergola withstand extreme weather conditions?

The pergola is weatherproof and designed to withstand most weather conditions. The heavy-duty trellis is supported by 50-lb metal-frame columns for stability. The stainless steel hardware will never rust.

Can the pergola be secured to the ground?

Yes, it can be securely fastened using brackets on the bottom of each column. Because of the weight of design, minimal support is needed.

Do the columns or beams come in different sizes or colors?

The columns are available as stand-alone pieces in 84" sizes. The pergola as a whole is sold only with 84" columns. The beams do not come in different sizes. The colors are available only as shown and there are five layers of paint involved in the process.

What are the dimensions for the pergola?

- 108.25" high
- 150" wide
- 150" deep

How much does it weigh?

It's total weight is 337 lbs.

How long does it take to assemble?

With a minimum of two people, the pergola takes about an hour and a half to assemble. Assembly can be completed with a single tool. The pergola is easier to put up than most shade-type products.

What is the warranty?

- 1 year warranty on structure and finish
