

Tuscany Beam Refinishing Process

We have a 2 step process using Sherwin Williams products to spot paint or completely paint the beams on both previous and current versions of the Tuscany Pergola.

The first step is Sherwin Williams Adhesion Primer (Interior/Exterior Latex). This should be the base coat to ensure proper coverage and bonding of the final coat. This comes in white but can be tinted towards the color of the Tuscany.

Older Version Tuscany – Sold from 2007 -2010

Brand - Resilience – Exterior Acrylic Latex - Flat
