

FIRE STONE HOME PRODUCTS

Green products

■ Fire Stone Home Products' cook number gas grill uses convection technology to cut in half the amount of energy needed to cook food. The grill is designed with 10 settings, including a food temperature sensor. From about \$1,200 at www.firestonehp.com.

■ Take recycling to a new level with a composting toilet. It treats human waste by composting and dehydration to yield a valuable soil additive. Operating with little or no water, the toilets bypass costly sewage systems. \$1,200 to \$1,500.
