Required Tools

- Utility Knife
  To cut and remove packaging
- 2 Open Ended Wrenches
  To secure gas connections
- Leather Gloves
  To protect hands from glass and sharp edges during install
- One AAA Battery (not included)
  Required for electric spark igniter installation
- Phillips Screwdriver
  To attach mounting screws to control panel
- Two people are required for this installation
Included with your Fire Pit

- M6 Allen Wrench [X 1]
- Bolt Caps [X 4]
- Touch-up Paint [X 1]
- Gas Valve Kit
  - Gas Valve (x1)
  - Mounting screws (x2)
  - Control knob (x1)

- Bolt A [X 4]
- Bolt B [X 4]
- M6X35
- M6X20

- Panel B [X 1]
- Center Support [X 1]
- Panel A [X 1]

- Crystal Fire CF-1242 Burner Kit

- Panel C [X 1]
- Access Door [X 1]

- Supercast Burner Cover
- Supercast Top
Assembly Instructions

1. Unpack the fire pit table contents from the box, and remove individual packaging from each piece.
2. Lay *Panel A* on soft, flat surface.
3. Position *Center Support* on *Panel A*.
   NOTE: it is very important to place the *Center Support* exactly as shown in the picture below. This will ensure that your burner (and propane tank, if applicable) will fit correctly with your fire pit table base. (Refer to “Included with Your Fire Pit” for component details).

4. Attach *Center Support* with *Bolt A* (x2).

NOTE: curve facing inward toward Control Panel.
4. Stand up Panel A and use 2 more Bolt A to attach Center Support to Panel B.

5. Use Bolt B (x4) to attach Panel C as shown.

6. Attach Access Door.
7. Hold the *Gas Valve* in place from behind the control panel while inserting the two included screws. Use a Philips screwdriver to fasten. Attach control knob by pressing on to the valve stem.

8. Set *Supercast Top* directly onto base as shown below.
Gas Connections

Read and understand your Crystal Fire owner’s manual before beginning burner hookups or using the device.
Do not use Teflon tape or pipe dope on flare fittings.

1. Reach inside the burner cut-out and attach natural gas supply line using a 3/8” flare fitting, or attach the included black rubber propane hose and regulator to the bottom fitting of the control valve.

   **TIGHTEN SECURELY WITH A WRENCH**

2. Lay the burner upside down on a flat, soft surface to avoid scratching the polished metal. Ensure the correct orifice is installed for the fuel type you are using (see Crystal Fire user manual included with burner for orifice sizing information) Attach the included metal flex hose to the burner.

   **TIGHTEN SECURELY WITH TWO WRENCHES**
3. Set Burner into the fire pit base exactly as shown and make final gas connection to the Control Panel.

- Metal flex line to burner
- **ONLY**

**TIGHTEN CONNECTION SECURELY WITH WRENCH**
Igniter Installation

1. Make sure the valve is in the OFF position before beginning.
2. Install sparker as shown, using a AAA battery (not included). Negative end should be placed inside the CF-SPARKER, positive end outside of the CF-SPARKER.

Sparker will not operate correctly without an ignition and ground wire attached.

- Plug both BLACK wires hanging from the burner into the back of the sparker box.

- Test system by pushing the button on the igniter. Consult the troubleshooting section of the Crystal Fire Owner’s Manual, if the spark is weak, intermittent, or not present.
1. Scatter all of the included *Glass Beads* evenly onto burner surface.

   **DO NOT OPERATE CRYSTAL FIRE BURNER WITHOUT GLASS BEADS OR OTHER DECORATIVE MEDIA**
After installing igniter and making gas connections, verify that all connections are tight and that no leaks are present using a solution of soapy water or a commercially available leak-check solution.

**Position Your Tank (if applicable)**

1. Remove door, connect the propane hose/regulator to the propane tank and hand tighten (DO NOT USE A WRENCH) and slide the propane tank past the dotted line to ensure the door closes properly.
2. With the tank inside, ensure that no hoses, wires, or any other components are kinked or touching the burner pan.

Care and maintenance note:

Light scratches may be removed from the poly-wood surfaces of this fire pit by gently sanding with 220-grit sandpaper in the same direction as the grain. Sanding too deeply or not following the grain of the material could result in permanent damage.
**IMPORTANT**

Please consult your Crystal Fire instruction manual for detailed instructions and important information related to the burner installation including: lighting and operating instructions, safety information, and proper tightening of connections with two wrenches.

**DO NOT ATTEMPT TO INSTALL CF-1242 BURNER WITHOUT FIRST CONSULTING THE CRYSTAL FIRE OWNER’S MANUAL.**

**WARNING**

After consulting the manual and following instructions, remember; before operating, all gas connections must be fully checked for leaks
