Contents

Contents........................................2

Required Tools....................................3

Placing and Assembling the Table.........4

Gas Connection.....................................6

Igniter Installation............................7
Required Tools

- Utility Knife
  To cut and remove packaging

- 2 Open Ended Wrenches
  To make gas connections

- Leather Gloves
  To protect hands from rough edges found on the coffee table.

- One (1) AAA Battery (not included)
  Required for piezoelectric igniter installation.

- Electric drill with Philips bit
  Used to attach top to base

Included:

- Tabletop frame
- Base
- Tiles (x12)
- Bracket
- Screw (x16)
Placing and Assembling the Fire Pit table

1. Remove all components from packaging and inspect for damage or missing parts.

2. Move the base to desired location and set into place.
   - When locating your coffee table, refer to the Crystal Fire manual and maintain clearance to combustibles.

3. Place a mounting bracket flush with the underside of tabletop in the position shown. Secure with 4 self-drilling screws.

Repeat this step for opposite end of table.
4. Set top assembly on base, centering the newly-installed brackets over the framing as shown.

Insert 4 self-drilling screws and repeat for opposite side.

5. With top securely fastened to base, set tiles into place.

*alternate model shown
Gas Connection

1. With proper orifice installed for the application and metal flex hose attached (see burner owner’s manual) set burner in base with burner neck pointed toward the control panel.

2. Connect the incoming gas hose to the valve and tighten securely. Repeat with flexible metal gas line from the valve to the underside of burner. It is not recommended to use Teflon tape or pipe dope on the connection to the valve with flare fittings.
   - LPG installations use the hose and regulator provided with the burner.
   - For Natural Gas hookup information and any other info not listed here consult your Crystal Fire owner’s manual.

---

Read and understand your Crystal Fire owner’s manual before beginning burner hookups or using the device.
Igniter Installation

1. Make sure the valve is in the OFF position

2. Unscrew sparker cap and hex nut (sparker included with burner). Install as shown below.
3. To properly install ignition system, a spark and ground wire need to be attached to the igniter box.
   - Your burner will arrive with three wires coming from the underside of the burner assembly. The **ORANGE** wire is used only for remote operated burner systems. The remaining two wires can be plugged into the ports on the back side of the sparker box in your control panel.
   - Test system by depressing the button on the igniter. A continuous repeating spark between the igniter electrode and spark-receiving probe means everything is connected properly. Consult the troubleshooting section of your crystal fire owner’s manual if spark is weak, intermittent, or not present.

4. Once ignition system is grounded and gas connections are secured and checked for leaks, set the burner back into its original position if it was removed during gas hookup.
Locating your Tank

1. Your tank should be positioned so that the fuel can be shut off after each use.
2. Slide the tank into the framework past the line shown below (table style may vary). This is to allow the door to close completely.
3. Confirm all hoses are clear and not touching the burner.

Position tank behind this line
Door Installation

*Exact model may differ

Set door on supports and close.

Magnet will hold door in closed position.

Finishing touches
Once fire pit is set up and in the desired position, scatter decorative glass on burner surface forming an even layer of beads.

- **DO NOT BURN WITHOUT GLASS OR OTHER DECORATIVE SUBSTRATE PRESENT**

**IMPORTANT**

Please consult your Crystal Fire instruction manual for detailed instructions and important information related to hooking up your linear burner, including safety information, proper tightening of connections with two wrenches and full burner setup and lighting instructions.

**DO NOT ATTEMPT TO INSTALL BURNER WITHOUT FIRST CONSULTING THE USER MANUAL. IF YOU ARE UNSURE OF HOW TO COMPLETE THE STEPS OUTLINED, CONSULT A QUALIFIED TECHNICIAN**

**WARNING**

After consulting the manual and following instructions, remember; before operating, all gas connections must be fully checked for leaks.

**WARNING:** This product can expose you to chemicals including Carbon Monoxide and Benzene which are known to the State of California to cause cancer or birth defects or reproductive harm. For more information, visit www.P65Warnings.ca.gov

**Warranty:** Fire pit tables are covered under a 1-year manufacturer’s warranty. Please visit [http://www.outdoorrooms.com/warranty-form](http://www.outdoorrooms.com/warranty-form) to register your product.
