Contents...............................................................2
Required Tools....................................................3
Placing and assembling the Table..............4
Igniter Installation.................................................6
Locating Propane tank.................................8
Finishing Touches.............................................9

Included Items:

- Igniter module
- #21 Natural Gas orifice (x2)
- #31 Liquid Propane orifice (x2) (pre-installed)
- 6-5lb bags of decorative fire gems
- Gas hose for 20lb LP Tank
- Stainless steel flex hose
**Required Tools**

- **2 Open Ended Wrenches**
  To make gas connections

- **Leather Gloves**
  To protect hands from rough edges found on the coffee table.

- **One (1) AAA Battery** (not included)
  Required for piezoelectric igniter installation.

- **AT LEAST two people required for assembly**
Placing and Assembling the Fire Pit table

1. After removing the fire pit from packaging, move the base without door to desired location and set into place.

2. When locating your coffee table, refer to the Crystal Fire manual and maintain clearance to combustibles.

3. Set the SuperCast into place on the fire pit base. Make sure the top is centered over the opening before proceeding.

4. Have one person hold the burner on edge in the recessed opening, while connecting the included flexible stainless steel hose to control valve and the T-manifold connected to burner. Use two wrenches to secure connection.
6. Connect incoming gas line (black rubber propane hose or hard pipe from outside source) to the lower fitting on the control valve, ensuring the knob is in the “OFF” position. Carefully set burner back into place in the table top.

*base shown may differ from actual product

Check system for leaks before use

Read and understand your Crystal Fire owner’s manual before beginning burner hookups or using the device.

Installation should be performed by a qualified gas technician
Igniter Installation

1. Make sure the valve is in the OFF position

2. Unscrew sparker cap and hex nut. Install as shown below.
3. To properly install ignition system, a spark and ground wire need to be attached to the igniter box.
   - Start by plugging the black wire hanging from the burner in to one side of the back of the igniter.
   - Plug the included grounding wire (which arrives attached to the underside of the burner) into the back of the sparker box.
   - Test system by pushing the button on the igniter. A continuous repeating spark between the igniter electrode and spark-receiving probe means everything is connected properly. Consult the troubleshooting section if spark is weak, intermittent, or not present.

4. Once ignition system is grounded and gas connections are secured and checked for leaks, set the burner back into its original position.

**NOTE:** Orange wire hanging from burner is not used for this installation.
Locating your Tank

1. Your tank should be positioned so that the fuel can be shut off after each use.
2. Slide the tank into the framework past the line shown below. This is to allow the door to close completely.
3. Confirm all hoses are clear and not touching the burner.

- Install door by setting the bottom on the catching hooks first and then closing. Magnets in the table will hold door closed.
Finishing touches

Once fire pit is set up and in the desired position, scatter decorative glass on burner surface forming an even layer of beads.

- **DO NOT BURN WITHOUT GLASS OR OTHER DECORATIVE SUBSTRATE PRESENT**

---

**IMPORTANT**

Please consult your Crystal Fire instruction manual for detailed instructions and important information related to hooking up your linear burner, including safety information, proper tightening of connections with two wrenches and full burner setup and lighting instructions.

**DO NOT ATTEMPT TO INSTALL CF-1242 or CF-1224 BURNER WITHOUT FIRST CONSULTING THE MANUAL. IF YOU ARE UNSURE OF HOW TO COMPLETE THE STEPS OUTLINED, CONSULT A QUALIFIED TECHNICIAN**

---

**WARNING**

After consulting the manual and following instructions, remember; before operating, all gas connections must be fully checked for leaks
**Warranty:** Fire pit tables are covered under a 1-year manufacturer’s warranty. Please visit [http://www.outdoorrooms.com/warranty-form](http://www.outdoorrooms.com/warranty-form) to register your product.

---

**WARNING:** This product can expose you to chemicals including Carbon Monoxide and Benzene which are known to the State of California to cause cancer or birth defects or reproductive harm. For more information, visit [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov)
