Congratulations on your purchase of a new outdoor gas fireplace!

These instructions will help you get your new fireplace set up in no time. Be sure to thoroughly read your gas burner instruction manual for important safety information and special considerations.

**Required Tools:**

- Razor Knife
  - For cutting packaging
- Hammer or Pry Bar
  - To remove staples from 1x2” securing boards
- Power Drill or Philips Screw Driver
  - To remove packaging screws
- 9/16” Deep Socket or Standard Socket with Extension
  - To attach top shelf
- Leather work gloves
  - To protect hands from rough and sharp edges of inner steel framing

**IT IS RECOMMENDED THAT A MINIMUM OF TWO PEOPLE ASSEMBLE AND INSTALL THIS FIREPLACE**
Unwrapping your Fireplace

WARNING!

The cast concrete top of this fireplace is not attached. Do not slide or move the unit until this has been removed.

1. Using a razor knife, carefully cut plastic covering fireplace, taking care to avoid cutting or scraping the unit inside.

2. Using a pry bar or hammer, pry up staples holding 1x2” boards to ease fireplace removal from pallet.

3. With a minimum of two people, carefully remove cast concrete top and hearth pad from fireplace and set aside.

4. Remove mantel from inside of firebox and set aside before proceeding to the next step.
Removal of Firebox

The cast concrete firebox weighs approximately 150-175lbs and should be removed before attempting to remove fireplace from shipping pallet for safety.

With a minimum of two people, carefully slide firebox forward while lifting slightly. Set aside. After removing firebox, move fireplace to its final location.
Mounting Shelf (for Sonoma)

1. Remove supplied bolts from the back of cast concrete mantel piece.

2. Have another person hold mantel in place against fireplace surface while you insert bolts and washers from inside the fireplace. Using 9/16” socket, tighten bolts until secure. Cast concrete top can be set into place at this time as well.

*DO NOT OVERTIGHTEN OR USE MANTEL TO LIFT FIREPLACE*
Final Assembly

1. With your Sonoma fireplace in the desired location, drill a small hole large enough for incoming gas line to pass through in a side, back, or bottom of the fireplace, depending on installation location.

2. Carefully slide firebox back into the unit. Slide forward until the back surface of the fire box meets the front stucco surface of the fireplace body.

3. Have a qualified licensed professional make all gas connections at this time. This should be done in accordance with local and national codes.

4. Slide the hearth pad into place carefully and evenly. If fit is too tight, lift firebox slightly while another person slides hearth pad into the unit.

5. Install gas burner by gently lowering into the cutout provided.

6. Install Logs and accessories as detailed in the provided instructions for those products.

IMPORTANT

Please consult your Crystal Fire instruction manual for detailed instructions and important information related to hooking up your CF-1224 burner, including safety information, proper tightening of connections with two wrenches and full burner setup and lighting instructions.

DO NOT ATTEMPT TO INSTALL CF-1224 BURNER WITHOUT FIRST CONSULTING THE MANUAL. IF YOU ARE UNSURE OF HOW TO COMPLETE THE STEPS OUTLINED, CONSULT A QUALIFIED TECHNICIAN

WARNING

After consulting the manual and following instructions, remember; before operating, all gas connections must be fully checked for leaks.
