Assembly Instructions

Once your fire pit has arrived, begin to unpack the contents.

1. Remove individually the burner from the supercast top and the supercast top from the base. Set both on a soft, flat surface.

2. Remove access door. Set aside. Then, place base in desired location. Re-attach the access door.

3. Next, place the supercast top back onto the base.
1. Reach inside the base and attach gas supply line to the input shown below, using a 1/2” flare fitting.

**TIGHTEN SECURELY WITH A WRENCH**

2. Ensure the correct orifices are installed for the fuel type you are using (see Wave Burner user manual included with burner for orifice sizing information).
3. Set burner into the fire pit base exactly as shown below and make final gas connection to the Control Panel.

4. Attach the flex line from the burner to the gas valve as shown above.

WARNING

After consulting the manual and following instructions, remember; before operating, all gas connections must be fully checked for leaks.
Igniter Installation

1. Make sure the valve is in the OFF position before beginning.
2. Remove sparker cap by turning counter-clockwise and insert a AAA battery (not included). Reinstall sparker cap.

Sparker will not operate correctly without an ignition and ground wire attached.

3. Plug both BLACK wires hanging from the burner into the back of the sparker box.

4. Test system by pushing the button on the igniter. Consult the troubleshooting section of the Wave Burner Owner’s Manual, if the spark is weak, intermittent, or not present.
Glass Installation

1. Scatter glass beads evenly onto burner surface. DO NOT OPERATE CRYSTAL FIRE BURNER WITHOUT GLASS BEADS OR OTHER DECORATIVE MEDIA PRESENT

2. Glass guard is required for Wave burner. Install according to instructions supplied with included glass guard kit.
